

## McDONALD'S PLAYLAND ADDITION

In 1998 H. Sutcliffe Limited was retained by John Clark Construction to complete the structural design for the footing, foundation and structural members for the McDonald's Playland addition in New Liskeard.

This 50' x 30' addition is designed to house an indoor playground for children and was built on to the existing McDonald's Restaurant.

Sutcliffe completed the design review of all wood and steel framing structural members and completed the foundation design, the footings and concrete floor slab design for this project.
